come with health and  
hygiene assurance as  
all products are

**Anti Bacterial & with low VOC's”**

# Key Properties For Heat Care

## Safe Healthy Living alongside Greenlam Products

The entire range incorporates Safeguard Plus™, a revolutionary development that retards the growth of the vast majority of common bacteria. This means our products are ideal for a range of environments from laboratories and kindergartens through to offices and domestic environments.

## GREENGUARD Gold Certification

This certification, with a stricter criteria, means that **GREENLAM**® products are suitable for use in environments where children spend significant periods of time, including schools, daycares and healthcare facilities.

All **GREENLAM**® Laminates are certified by prestigious American body NSF International, making them the safest laminates for human health, our surfaces can be used in situations where they will have direct contact with food. Our surfaces have also been tested in accordance with EC directive 1935 with regards to food safety. Our products were proved fully compliant through testing to the demanding EU Food Commission Regulation 10/2011 with successful testing to BSEN 1186-1:2002, BSEN 1186-3:2002 & BSEN 1186-14:2002.

## GREENGUARD Certification Program

**GREENLAM**® laminates are classified under the Low Emitting Product category when measured for potentially harmful emissions. This is an assurance that our products are ideal for use in interior environments where air quality is vitally important.

**GREENLAM**® products have been awarded CE certification which is given to those manufacturers who declares that the product complies with the essential requirements of the relevant European health, safety and environmental protection legislation, in practice by many Product Directives. CE Marking on a product indicates to governmental officials that the product may be legally placed on the market in their country.

The FSC certification is considered the "gold standard" designation for wood harvested from forests that are responsibly managed, socially beneficial, environmentally conscious and economically viable. If a product, like a piece of tropical hardwood furniture, is labeled as "FSC Certified", it means that the wood used in the piece and manufacturer that made it met the requirements of the forest stewardship Council. In our case we can provide FSC grade laminate for any project which wants to earn LEED points for Green building certifications.
