

# Greenlam — Edition 2024 — 2026

**Greenlam**  
LAMINATES

Nature always  
gives us more  
than we seek.

Greenlam  
HPL Collection  
1300x3050 mm

**N** NEW

**A** 940 x 2160mm

**B** 1220 x 2440mm

**C** 1220 x 3050mm

**D** 1525 x 3660mm

**E** 1830 x 3660mm      **CR** Crown

**F** 1320 x 4200mm      **PC** Partial Crown

**G** 1830 x 4320mm      **ST** Straight

Standard size 1300x3050 mm (4.25'x10'),  
unless mentioned otherwise.

The richness I experience comes from Nature, my source of inspiration, solace and adventure. Its way of revealing wonders and surprises astounds: In colours, I see beatific smiles. In flowers, I enjoy heartening transformation. In stillness, I feel inner peace. Truly, Nature is Heaven under my feet and all around me.

# Our Story

**Greenlam**  
LAMINATES

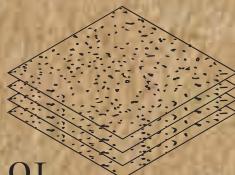

# Driven for Excellence

Among the world's top three producer of laminates, Greenlam Laminates brings a legacy of exceptional artistry, unsurpassed quality and unyielding passion for excellence to the table. With a production capacity of 24.52 million sheets every year, we have always ensured that superior quality products are available to you. Innovative technology and creative solution have been our guiding principles from day one.

Professionals such as architects, interior designers and end consumers can rely on us to immerse their decor ideas with elegance and character.

We have our team and a wide network of dealers and distributors, in over 100 countries to thank for maintaining our level of excellence and commitment. Our esteemed list of clients inspire us to innovate and ideate towards delivering the best.

# Kraft Cores

O1

## Kraft Papers

All Greenlam laminates start with layers of A++ Grade kraft papers for durability.

O2

## Barrier Paper

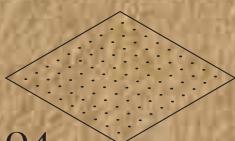

Next, a sheet of barrier paper goes over the kraft layer. This precautionary step eliminates shadows cast by the kraft layer on lighter-coloured patterns, enhancing the brightness and sharpness of the design.

O3

## Decor Paper

The decor sheet follows the barrier layer. It features the prints and patterns on our laminates. Greenlam's diverse designs come from some of the world's best printers located in Europe. Our dedicated design team thoughtfully curates a collection of décor papers, spanning enduring classics, present trends and inspirations for tomorrow.

O4

## Overlay Tissue

Finally, each Greenlam laminate is topped with a layer of superior overlay tissue, which not only offers an exceptionally even surface colouration but also protects against abrasion levels higher than industry standards.

# Sustainability Story

## Responsible beauty

We believe creating beautiful spaces does not have to be at the expense of hurting our planet. At Greenlam, we're committed to fight climate change. For us, this means taking accountability by putting environmentally conscious production, practices and packaging at the centre of our business model.

## Zero liquid discharge

We carry out continuous research, improvements and modifications in our processes to ensure that no toxins or pollutants in the form of liquids or emissions are discharged from our plants.

## Responsible forestry

Our products are made from recycled or FSC® and PEFC™ certified paper that come from sustainably managed forests, which contribute to combating climate change because of their capacity to remove carbon from the atmosphere and store it.

## People- and environment-friendly products

Our laminate production is free of noxious asbestos, copper chromates, arsenate compounds, lead, heavy metals, urea, formaldehyde compounds and restricted hazardous substances. Our products are also compliant with the global emission standards of VOCs^, formalin and other allied chemical constituents as part of our effort to maintain peak indoor air quality.

## Effective waste management

The real-time monitoring of our resources significantly reduces processing costs, waste production and disposal expenditure. Together with our waste- paper recycling endeavours, we save 8,000 fully-grown trees every year.

## Responsible logistics

We use only fuel-efficient and low-gas emitting vehicles to reduce carbon dioxide emissions.

## Optimal indoor air quality

Stringent air monitoring and periodic tests ensure that our internal work environment is at its best.

## Renewable energy utilisation

We procure various renewable energy resources, including biofuel and solar power, to be used in our laminate production.

## Synthetic and petrochemical ingredient reduction

Where possible, synthetic and petrochemical ingredients are substituted with naturally occurring components derived from nature to further lower carbon and VOCs<sup>^</sup> emissions and enhance our laminate handling quality.

## Energy and water conservation

We embrace methods that promote environmental protection and renewal, such as our pressurised hot water system designed to scale back groundwater withdrawal, improving energy efficiency.

# Certifications

## Environmental credentials

We are proud to exceed the industry benchmark in the area of green certifications. In particular, rigorous tests have shown that Greenlam laminates emit minimal levels of VOCs^, which have the potential to adversely impact the health of people that are exposed, and are certified to be suitable for use in environments where children may spend significant periods of time, such as hospitals and clinics.

FSC®: Forest Stewardship Council. Greenlam provides FSC® certified products on request (Certification No. DNV-COC-002714)  
PEFC™ : Programme for the Endorsement of Forest Certification. Greenlam provides PEFC™ certified products on request (Certificate No. SCS-PEFC/COC-003328)

<sup>^</sup>Volatile Organic Compounds

# No compromises on quality

We care deeply about the details – of the products we create, and how we make them. Throughout Greenlam's entire manufacturing process, we apply the highest standards to ensure that the most exacting quality is attained, beginning with sourcing from suppliers who provide us with paper which is either recycled or made from responsibly sourced\* timber, to collaborating with printers behind exquisite laminate designs.

The final result is a product that is consistent in quality, incredibly durable and warp-resistant.

## Anti-virus and Anti-bacterial Protection

Greenlam laminates are treated with high-efficacy, anti-microbial agents, retarding and eliminating up to 99.9% of commonly found bacteria and viruses, including SARS-CoV-2, which causes COVID-19.

## Fire Retardant

Greenlam laminates have been tested to achieve optimal fire-propagation reduction and surface spread-of-flame performance. Proof of certification is available upon request.

## NSF Certification

Greenlam laminates are certified according to the NSF<sup>^^</sup> food safety and environmental health standards, and are harmless upon direct contact with food.

\*As per the test report 99.99% of bacteria and virus gets retarded within 24 hours of contact  
^^National Sanitation Foundation

A lifetime warranty  
against manufacturing  
defects comes with  
all Greenlam  
laminates.

# Colours

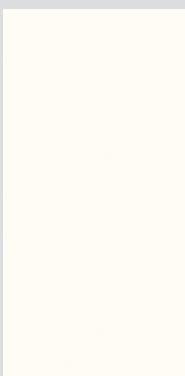

OI

Choose from the entire spectrum of colours that range from pretty pastels to electric hues. Our collection also offers different finishes that cater to your specific design, this includes jupiter, satin, dazzle & many other textures.

# AFX

Say goodbye to fingerprint smudges. The Greenlam AFX collection of laminates is scratch-resistant and can be easily wiped down to remove impurities and grease marks.

ANTI FINGERPRINT SURFACES

Greenlam AFX Laminates are ultra matt surfaces made with the Electron Beam Curing (EBC) technology. These self-healing laminate surfaces are scattered with a dense grid of cross polymers, in the event of micro-scratches this grid can be reactivated with the application of heat, helping the surface to reacquire its original appearance. Greenlam AFX allows designers and specifiers to achieve the ultra matt look with the benefits of food contact safe, anti-fingerprint, hydro repellent , anti-mould and scratch resistant properties for wide spectrum of applications.

# Unicore

This exclusive range of laminates are infused with colour; not just on the surface but right down to its core. Unicore laminates are thicker, more durable and absolutely void of dark edges.

100% solid colour  
even in the core of  
the laminate not just  
the surface

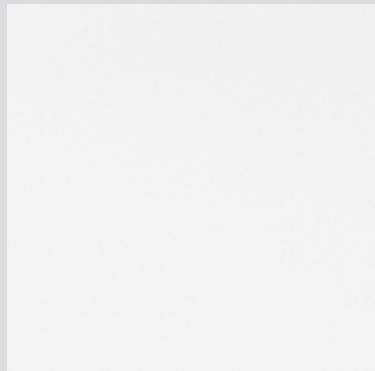

Offers abrasion of  
over 3000 cycles

Discard brown  
edges like in  
regular laminates

# Patterns

O2

With a wide range of patterns and textures, our laminates have been designed for every possibility. This ranges from naturally occurring stones like marble and granite to man-made materials like textiles and concrete. With advanced printing technology, we are able to mimic the finest details of the materials we replicate, resulting in ultra-realistic surfaces that are almost indistinguishable from the original.

LEADER

# Can't find what you want?

Flex your creativity and customise your own designs. With Greenlam Custom Laminates, you can add your own print or pattern to our world-class laminates. Whether it's a large-scale photograph, a personalised illustration or a unique design, our superior digital technology allows you to convert your creativity into your very own unique laminates.

# Metals & Pearlescents

Whether you opt for brushed metal or speckled pearl, this collection of laminates leaves a lasting impression that shimmers and shines.

# Woods

03

The beauty of well defined wood grains will never go out of style. From quiet minimalism to bold masculinity, the secret of our ultra-realistic wood laminates lies in the precise colour tones and three-dimensional surface designs. Backed by our experience and knowledge in wood veneers, we are able to achieve the unique veneer look that give our laminates their distinct wood lines, swirls, knots and cathedrals.

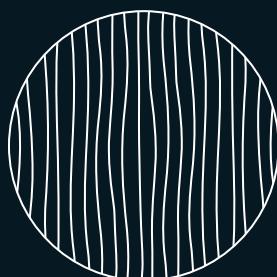

## Crown CR

Tangential cuts along the growth rings of the log produce crown cut woodgrain with a pattern that is characterised by straight grains intermixed with cathedrals. The looks of crowns and knots are bold and distinctive, giving a unique character to the woodgrain.

## Partial Crown PC

Similar to crown design, it is cut vertically in the middle along with the ripple, leaving only half of the long, thin crown rings. The result is a woodgrain that has retained its natural look, with less complexity.

## Straight ST

For those desiring simpler, clean design, straight woodgrains are the perfect answers. The lines have a slight wave, adding some variety to the pure wood design that come with no knots or crown.

# Linea

Linea texture is a visual symphony of organic elegance, capturing the essence of natural wood with intricate, graceful lines. Rich, authentic and finely detailed, it adds a touch of nature's beauty to the surroundings.

Antifungus Efficacy & Activity					
Growth after 28 days	ASTM G-21-2015	Rating	1	O (No Growth)	O (No Growth)
<b>HGS</b> = Horizontal General Purpose Standard <b>HGP</b> = Horizontal General Purpose Post Forming Grade <b>HGF (FR)</b> = Horizontal General Purpose FIRE RETARDANT <b>Fire test performance</b> will depend on laminate thickness and construction, substrate type and thickness, and adhesive used. It is advised to contact the laminate manufacturer for details of test reports and certifications held. Greenlam can supply type S and F HPLs. <b>Class (Rating)</b> – 1= Surface damage, 2= Severe appearance alteration, 3= Moderate change, 4= Slight change visible at certain angle, 5= No change			<b>Virus tested:</b> MS2 Bacteriophage <b>Bacteria tested</b> – 1.Pseudomonas. 2. Entrococcus Faecalis, 3.Candida Albicans 4.Pseudonomas Aeruginosa 5. Escherichia Coli 6. Klebsiella 7. MRSA (Methicillin Resistant Staphylococcus Aureus) 8. Salmonella Enterica <b>Fungus tested:</b> 1.Aspergillus niger 2. Penicillium funiculosum 3. Gliocladium virens 4. Chaetobium globosum 5. Aurobasidium pullulans As per the test report 99.99% of bacteria and virus gets retarded within 24 hours of contact.		

## LIMITED WARRANTY

Greenlam Industries Limited (GREENLAM®) warrants to the original Buyer that GREENLAM® HPL will be free of defects, under normal, proper and intended usage within acceptable manufacturing specifications for a period of one (1) year from date of sale to the original Buyer.  
Buyer's remedy in case of claims, as a result of defective HPL, shall be limited to only the replacement of HPL by GREENLAM®.

## TRADEMARKS

GREENLAM®, the GREENLAM® logo and are registered trademarks of Greenlam Industries Ltd or its subsidiaries.

## CHANGE OF SPECIFICATION

The company reserves the right to change specifications at any time without prior notice, It is recommended that you request actual samples prior to specification.

# OUR COMMITMENT TO QUALITY ASSURANCE

## Safe and Healthy Living Alongside Greenlam Products

The entire range is manufactured with Safeguard Plus™ technology, a revolutionary development that retards the growth of 99.99% of bacteria and viruses within 24 hours of contact. This means our products are ideal for laboratories and kindergartens, to offices and domestic environments.

## GREENGUARD Certification Program

**GREENLAM®** laminates are classified under the Low Emitting Product category when measured for potentially harmful emissions. This is an assurance that our products are ideal for use in interior environments where air quality is vitally important.

## GREENGUARD Gold Certification

This certification, with a stricter criteria, means that **GREENLAM®** products are suitable for use in environments where children spend significant periods of time, including schools, daycares and healthcare facilities.

**GREENLAM®** products have been awarded CE certification which is given to those manufacturers who declare that the product complies with the essential requirements of the relevant European health, safety, and environmental protection legislation. In practice by many product directives. CE marking on a product indicates to government officials that the product may be legally placed in the market in their country.

All **GREENLAM®** Laminates are certified by prestigious American body, NSF International, making them the safest laminates for human health. Our surfaces can be used in situations where they will have direct contact with food. "Our surfaces have also been tested in accordance with EC directive 1935 with regards to food safety. Our products were proved fully compliant through testing to the demanding EU Food Commission Regulation 10/2011 with successful testing to BSEN 1186-1:2002, BSEN 1186-3:2002 & BSEN 1186-14:2002".

The FSC certification is considered the "gold standard" designation for wood harvested from forests that are responsibly managed, socially beneficial, environmentally conscious, and economically viable. If a product, like a piece of Tropical hardwood furniture, is labeled as "FSC certified", it means that the wood used in the piece and manufacturer that made it met the requirements of the Forest Stewardship Council. Greenlam provides FSC® certified products on request (Certification No. DNV-COC-002714).

**GREENLAM™** products are tested in accordance to BS EN 438 – 2 and strictly conforms to all the testing standards for dimensional stability and performance levels such as boiling water, moisture, impact, scratches and stains resistance.

**GREENLAM** products are certified with Environment Product Declaration (EPD), confirming commitment to environmental responsibility and sustainability. This certifies transparent and verified information about the environmental performance of a product throughout its life cycle.

Maintaining the luminous shine and looks of GREENLAM laminates is easy.  
Just follow these simple methods for optimal durability of the laminates:

---

CLEANING  
PROCESS

1. DAMP CLOTH OR SPONGE

A damp cloth or sponge is all you need. You can also use a mild soap or detergent to clean the surface.

2. DETERGENT

In cases of difficult stains such as coffee or tea, do not fret. These can be easily removed using a mild household cleaner or detergent.

3. BAKING SODA

If the stain becomes stubborn, use a little baking soda and water, and apply with a soft bristled brush. But remember excessive scrubbing or exerting too much force may damage the decorative surface, especially if it has a gloss finish.

---

PRECAUTION

1. HARSH CHEMICALS

Oven or drain cleaners will etch and discolour the decorative surface. If the product spills, remove immediately, rinse and wipe dry.

2. HOT OBJECTS

Protect the surface from the heat generating appliances by using a trivet or insulated pad. Prolonged exposure to high temperature may result in separation of the laminate from the substrate

3. SHARP OBJECTS

Never use knives or other sharp objects directly on a decorative surface. Use cutting boards to protect the laminate top.

4. IMPACT

Be careful not to drop heavy objects or hammer directly on the surface. Even though high-pressure decorative laminates have excellent impact resistance, chipping or cracking may occur as a result.
